Public transit is an important transportation mode in our community. The public transit agencies in the MPO operate services within the financial constraints presented and, like the road agencies, are continually seeking opportunities to improve and to secure additional resources where available. Current and future transit studies will help to identify specific projects.

Areas of Interest for modeling

These are not proposed road construction projects but are requested to be modeled to gauge traffic flow.

- Model: New partial interchange at I-96 & Sternberg Road. Westbound off / eastbound on, 2035.
- Model: 2,500 additional vehicle ADT from the area east of Harvey Street, south of Sternberg Road, north of Pontaluna Road, west of I-96, 2028.
- Model: M-46 west of US-31 and Shoreline Drive
- Model: Shoreline Drive roadway reconfigurations on US-31 BR/Shoreline Drive

Illustrative Projects

US-31 Business Route over White River (Whitehall and Montague):

- Bridge replacement due to deteriorating condition. Increase bridge span and height to accommodate floodplain requirements. May include roadway improvements. Pending further study.
